Profile

Producer with a shipped AAA title and a hands-on engineering practice built in seven months of focused self-study. A decade of getting groups of people to build things together and explain them outward — across theatre, pharma, AAA games, indie studios, and education. Currently co-founding Napkin Sketch Games (Godot/GDScript) and leading a 6-person team as producer + engineering lead on a separate visual novel / turn-based RPG. Ship with AI-assisted workflows (Claude Code, Gemini CLI, Codex). Open to Producer, Technical Producer, Production Engineer, or Technical PM roles in games, ed-tech, or AI/dev-tools.

PRODUCTION EXPERIENCE

Assistant Producer — Wayfinder (1 Shipped Title), *Digital Extremes, External Projects* 11/2022 – 11/2023

- Supported production across 3 organizations and 150+ team members spanning Production, Art, Dev Ops, QA, Engineering, Audio, Localization, Marketing, and Community Management
- Title shipped to 500K+ copies sold, ~\$10M revenue, and positive Steam reviews across PC (Steam/GOG), Console (Sony/Microsoft), and Mobile (iOS/Android)
- Owned end-to-end Localization across 13 languages — primary point of contact for localization vendors, cultural QA review, build coordination with engineering, and the operational documentation that kept dozens of contributors paid and shipping on time
- Subject Matter Expert on PM tooling (Jira, Confluence, Favro, Asana) — built repeatable workflows, roadmaps, and asset tracking systems for multiple departments
- Organized milestone deliveries and invoiced documentation across Closed Beta, Open Beta, Early Access, and full release
- Flagged and documented issues in Jira for QA; assisted in playtesting and user focus tests

Remote Account Manager & Master Sales Trainer, *Amplify & Syneos Health* 02/2019 – 04/2022

- Managed 1,000+ client accounts — sales, CRM tracking, data analytics, and software implementation, totaling \$3M in sales (679% annual growth, 2021)
- Onboarded and trained 15+ new hires on software tools, soft skills, and live coaching practices

TECHNICAL PROJECTS

Co-Founder, Producer & Engineer — Napkin Sketch Games, 02/2026 – Present

Godot 4.6 · GDScript · 3D Systems · Git

- Co-founded indie studio currently developing a 3D cozy builder in Godot 4.6 / GDScript
- Engineering across a vertical slice: 3D character controller with momentum chaining (step-up, ledge catch, slide-jump, surface-aware sliding), grid-based construction with ghost preview and MultiMesh rendering, physics-driven gameplay objects (trampolines, fabric surfaces with procedural meshes), controller-first build hotbar, save/load with named slots

- Operating dual role: production lead (sprint planning, code review coordination, rebase-preferred PR workflow, async cross-timezone communication) and active engineer working from design docs with GUT-based unit testing on core math

Engineering & Production Lead — Project Zelena, Visual Novel / Turn-Based RPG,
Godot 4.5 · GDScript · Dialogic 2 · Git

01/2026 – Present

- Leading a 6-person team (designers, artists, engineers) as both producer and engineering lead
- Architected a modular autoload-based framework of 18 interconnected systems — persistence layer serializing state across combat/inventory/affinity/narrative, d20-based combat engine with class-specific abilities, scene transitions, save/load (3 slots + checkpoint), NPC affinity tracking
- Delivered playable vertical slice ~12 days ahead of schedule
- Built custom developer tooling including a .dtl timeline parser that renders Dialogic files as navigable HTML for QA and design review
- Designed a NarrativeScene base class pattern enabling rapid scene creation — new scenes require only a 4-line override

Web Development — Portfolio & Client Sites,

2025 – Present

HTML/CSS · AI-Assisted Web Development · Prompt Engineering · GitHub Pages

- Built and maintain a professional portfolio site showcasing production work, project metrics, and testimonials using AI-assisted development and prompt engineering
- Designed and shipped embodiedactorsstudio.com — a client-facing business site with service packages, responsive mobile design, and booking system

Python RPG — Text-Based Adventure, *Python · OOP · JSON · State Machine Pattern*

2025 – 2025

- Self-taught Python and built a ~1,500-line multi-file RPG with 4 playable classes, turn-based combat, inventory, branching narrative, and save/load
- Implemented a custom signal/event system for damage, healing, and death notifications across decoupled modules
- Applied state machine pattern for game flow control, with data/logic separation and JSON-based persistence

SKILLS & TOOLS

Development

- Python, GDScript, HTML/CSS
- Godot 4.6, Dialogic 2
- Git, GitHub
- OOP, State Machines, Signals
- 3D Systems, MultiMesh Rendering, Procedural Meshes, Physics-Driven Gameplay

Production

- Jira, Confluence, Favro, Asana
- Agile / Scrum (ICAgile Certified Professional)
- Roadmap Development
- Localization Management (13 Languages)
- Cross-Platform Publishing (PC / Console / Mobile)

AI & Tooling

- Claude Code, Claude Desktop
- Gemini CLI, Codex
- MCP Servers, API Integration
- Prompt Engineering, AI-Assisted Development

Collaboration

- Cross-Team Communication
- Documentation & Process Design
- Milestone & Client Management
- Bug Triage, QA Coordination
- G-Suite, Data Analysis

EDUCATION

Bachelor of Fine Arts, *University of the Arts*

- Game Production I & II
- Game Design & Development (F.I.T.)
- Intro to Unreal 5
